

Prof. PAOLA FIORETTO, Italy

Paola Fioretto is Associate Professor in Medicine at the University of Padova, Italy. She started her research on renal physiology in diabetes and, during her PostDoc Research Fellowship at the University of Minnesota, she devoted her interest to renal structure and ultrastructure in diabetes. In USA and in Italy she has performed kidney biopsies and analyzed them by morphometric analysis in both type 1 and type 2 diabetes. Among her contributions to the understanding of diabetic kidney disease, the description of the heterogeneity in the structural lesions underlying renal dysfunction in type 2 diabetes, and of reversal of established diabetic glomerulopathy lesions in patients with type 1 diabetes after pancreas transplantation. She has received several awards, including the Albert Renold award from the EASD, a Career Development Award from JDFI, the Morgagni Jounng Investigator Award, the Novartis Jounng Investigator Award for Patient Oriented Research, the Italian Society of Diabetology Award, the Castelli Pedroli Prize from the EASD. From 2005 to 2008 she has been President of the European Diabetic Nephropathy Study Group of the EASD and Chair of the Scientific Committee of the Italian Society of Diabetology, and she chaired the 'microvascular complications' group of the DIAMAP (Road Map for Diabetes Research in Europe), project of EC-EASD. She is Vice President of the EASD (2014-2017). She has published more than 120 peer reviewed papers and 30 book chapters.
